TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, HTML/CSS
Frameworks: React, Next.js, Node.js, Tailwind CSS
Tools: Git, GitHub, VS Code, IntelliJ, Supabase, Vercel, PostgreSQL

EXPERIENCE

Dementia Aide

Sept 2025 – Present

Software Engineering Intern, Cupertino CA

- Redesigned and developed a full-stack caregiver support platform, transforming **Figma** prototypes into a responsive web application focused on improving caregiver well-being.
- Built AI-driven recommendation features, including a resource chatbot, personalized educational video suggestions, and a search system for caregiver support products.
- Integrated **Shopify** APIs and storefront services to streamline e-commerce functionality, enabling secure checkout and seamless product management across platforms.

Target

Dec 2022 – Present

Fulfillment Expert Team Captain, Colma CA

- Led and coordinated a team of 7 to 20 team members daily, delegating tasks and ensuring goals and deadlines were met.
- Collaborated with Team Leaders and Executive Team Leaders across departments to manage priorities and maintain efficient operations.
- Identified and implemented process improvements to increase efficiency and improve team performance.

PROJECTS

DementiaAide | Dementia Care Support Platform

2026

Next.js, TypeScript, NLP

- Built a **Next.js** and **TypeScript** web app that helps dementia caregivers get fast, **scenario-specific guidance** through **natural language queries**.
- Developed an **advice engine** that **classifies 13+ caregiving scenarios** including wandering, aggression, and sleep issues.
- Designed a **responsive, accessible interface** with **searchable resources** and product recommendations to help users find support quickly.

FulfillFlow | Warehouse Order Fulfillment API

2026

Java 21, Spring Boot, PostgreSQL, RabbitMQ, Redis, Docker

- Built a **Spring Boot REST API** for warehouse order fulfillment with **JWT role-based authorization**, OpenAPI documentation, and Dockerized infrastructure.
- Prevented inventory overselling and duplicate reservations using **PostgreSQL transactions**, row-level locking, and idempotency keys.
- Implemented reliable asynchronous processing with a **transactional outbox**, **RabbitMQ** retries and dead-letter queues, **Redis** caching, and full-stack GitHub Actions tests.

Application Tracker & Resume Fit Analyzer

2025

Next.js, TypeScript, React, Tailwind CSS, Supabase, Google OAuth, Vercel

- Built and deployed a full-stack internship tracker with resume PDF upload, role-fit analysis, application metrics, and a searchable pipeline dashboard.
- Integrated **Google OAuth**, **Supabase Postgres**, and row-level security to support secure cross-device data saving for each user.
- Developed resume matching logic to compare resumes with job descriptions and return matched and missing skills with improvement tips.

EDUCATION

San Francisco State University

Expected May 2027

Bachelor of Science in Computer Science, San Francisco CA
